

The Fiber Society

Graduate Student Paper Competition

Award Recipients

*The purpose of the Graduate Student Research Paper Competition (GSPC) is to recognize outstanding achievement in science, technology, and applications of fibers at the graduate student level. A Call for Submissions is published in early July. Students submit full-length papers that are judged on scientific rigor and technical content, and on proper technical writing style. The GSPC Committee reviews all submissions and selects three finalists to present their papers at **The Fiber Society's** Fall Conference. Oral presentations are judged by a panel selected from among the conference participants, with a winner chosen as the year's awardee.*
